

500-126 – STEEL ENCLOSURE FOR LOPOLIGHT NLC

The steel cabinet offered as an option for all Lopolight NLCs is a single piece steel body enclosure with a front faced, reversible hinged door.

A cable gland plate is located at the bottom with cable glands for each cable required on the installation and blinding caps to seal off any remaining entries.

The enclosure is approved for use as an electronics cabinet on maritime vessels. Wall mounting brackets are included for an easy installation.
